EXPERIENCE

Freelance Full Stack Web Developer

Remote | 2023 – Present

- Developed custom e-commerce platforms with shopping cart, payment gateway integration, and JWT-based authentication.
- Created RESTful APIs connecting frontend and backend using NestJS and Express.
- Implemented containerized deployments with Docker and NGINX for scalability.
- Focused on UI/UX improvements, SEO optimization, and responsive design.

Personal Projects

GitHub Portfolio | 2020 – Present

- Built web apps demonstrating integration with third-party APIs (e.g., MercadoPago, Stripe, Google OAuth).
- Designed and implemented a centralized REST API following a multi-tenant architecture to serve multiple client applications efficiently, improving scalability and reducing server resource usage.
- Utilized MySQL for secure relational data storage (user accounts, comments, reviews) and MongoDB for high-performance read operations, such as product data delivery, enhancing response times and flexibility.
- Implemented Redis caching, Socket.IO for real-time notifications, and SMTP (Nodemailer) for automated user email alerts.
